

AGUSTA ADA KING-NOEL

COUNTESS OF LOVELACE

Ada born 1815 is an English mathematician and writer known as the world's first computer programmer,

"The Enchantress of Numbers"

Spouse: William King-Noel, 1st Earl of Lovelace

Privately taught in math & science

Caitlin Doveur, "Awesome, Twisted, and Beautiful": A Q&A with Lauryn Holden

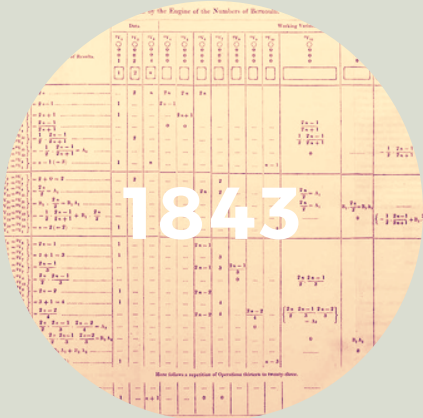

She believed that computers could used for solving complex issues other than number-calculations.

MAJOR MILESTONES

Ada met Charles Babbage, "the father of computers" and the creator of the Analytical Engine.

Ada became the Countess of Lovelace when her husband became the Earl of Lovelace.

She created notes containing what's considered the world's first algorithm for the Analytical Engine.
