

André Truong Trong Thi

1936-2005

Education & Early Life

Truong Thi was born on 1936 in Ho Chi Minh city within Cholon. At the age of 14 he studied abroad in France, attending EFREI (an engineering school of information and digital technologies).

Innovations

After gaining experience at Schlumberger and Intertechnique Truong Thi formed his own company known as R2E. With Francois Gernelle and a team of engineers they invented the Micral, the first personal computer.

Awards

In 1995 Truong Thi was awarded the Légion d'honneur.
