

許峰雄

HSU, FENG-HSIUNG

Builder of the Machine Who Defeated the World's Chess Champion

EARLY LIFE AND EDUCATION

Born in Keelung, Taiwan, Hsu immigrated to the United States after graduating from National Taiwan University.

CHIPTTEST, CHESS COMPUTER

Hsu developed ChipTest, a simple chess playing computer. ChipTest laid the foundation for Deep Thought, Deep Thought II, and Deep Blue Prototype.

DEEPBLUE AND KASPAROV

In 1991, Hsu developed the supercomputer Deep Blue, who challenged world chess champion Garry Kasparov. Kasparov was victorious over Deep Blue in a 1996 match, but lost the 1997 rematch.

LIFE AFTER DEEPBLUE

In 2003, Hsu joined Microsoft Research Asia, in Beijing. There, he plans to make another computer to play the ancient Chinese game of Go.
